**DETAILED ACTION**

***Preliminary Amendment***

1. The Preliminary Amendment have been filed 25 June 2003 has been received.

***Information Disclosure Statement***

2. The Information Disclosure Statement has been received.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kocourek et al. (US 4,958,666) alone or in view of Tanaka (EP 0 769 523).

The Kocourek et al. reference discloses a solution container for a photoprocessing machine comprising a rigid outer shell (1) and two internal chambers (3,4), the first

chamber for housing a working strength processing solution and the second chamber for collecting spent processing solution. The solution container is reusable (see column 5, lines 18 – 25). Should there be a possible argument that only the internal chambers are reusable and that the outer shell is not reusable, one would be motivated to reuse the outer shell at least for economic reasons. The secondary reference, Tanaka, is an example of reusing the outer shell of the solution container, see claim 5.

***Allowable Subject Matter***

6. Claims 7 – 10, 23 – 30, 32 – 36 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest at least a processing system for processing photosensitive media having a supply cartridge comprising a silver removal device.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bernhardt et al. (US 4,473,283) moves the supply cartridge from a first position to a second operating position.
